Ahmedabad, Gujarat, India | +91 9601765058 | chhasatiyaravi1904@gmail.com

PROFESSIONAL SUMMARY

Full Stack Developer & Architect with 4+ years of proven expertise building production-grade enterprise applications using modern Laravel, Vue.js, React, and Flutter stack. Specialized in end-to-end system design—from secure RESTful APIs to dynamic frontend experiences—with deep proficiency in banking integrations, authentication systems, and high-performance database optimization. Delivered enterprise applications across fintech, HRMS, and SaaS domains. Known for shipping features that scale reliably and maintaining code quality under Agile workflows.

TECHNICAL COMPETENCIES

Backend: Laravel 8–12 | PHP 8+ | RESTful APIs | Filament 4 | Laravel Sanctum | JWT | RBAC

Frontend: Vue.js 2 & 3 | React.js | Nuxt.js | TypeScript | Tailwind CSS | Bootstrap

Database & Caching: MySQL | Redis | Query Optimization | Schema Design

Cloud & DevOps: AWS (EC2, S3, SQS) | Docker | Nginx | Linux

Third-Party Integrations: Banking APIs | Payment Gateways | Firebase | AWS Services

Developer Tools: Git | GitHub | Bitbucket | Jira | Postman | Composer | npm

PROFESSIONAL EXPERIENCE

Full Stack Developer | Zignuts Technolab Pvt. Ltd. | January 2022 – Present

- Built enterprise-scale financial platform (Edamana) using Laravel 12, Vue.js 3 & React.js with secure REST APIs and role-based dashboards
- Designed and implemented authentication & authorization using Laravel Sanctum and JWT across 3+ production applications
- Architected Bank Management module with real-time analytics, Audit Logs, and Transaction Lifecycle workflows
- Optimized database queries and implemented Redis caching, reducing API response times and database load
- Integrated multiple third-party APIs including banking services, AWS infrastructure, Firebase, and payment processors
- Led full-stack feature development using React.js + TypeScript and Vue.js 3 with Laravel backend in 2-week sprint cycles
- Implemented workflow automation systems reducing manual intervention through approval chains and state management
- Mentored junior developers on Laravel architecture patterns and modern frontend best practices

FEATURED PROJECTS

Edamana – Digital Banking & Financial Platform

Laravel 12 | Vue.js 3 | React.js | Flutter | TypeScript | MySQL | Redis | Filament 4

- Engineered Bank Management module with real-time dashboards for regulatory compliance and reporting
- Built Integration Monitoring system with automated alerting for API connection tracking
- Developed Audit Log module capturing transaction events with full traceability
- Implemented secure transaction lifecycle workflows with multiple payment method integrations
- Developed mobile-first interfaces using React.js and Flutter for seamless banking experience
- Optimized critical banking queries achieving significant reductions in response times

JVC-JCI – Community Management SaaS

Laravel 12 | Vue.js 3 | TypeScript | React.js | MySQL | Redis

- Architected Member Management module for international SaaS serving multiple regions
- Built REST API layer with comprehensive permission system and granular access control
- Implemented role-based UI rendering across Vue.js and React.js components
- Established TypeScript contracts between API and UI eliminating type-related bugs

ZigTrack – HRMS & Productivity Platform

Laravel 8 | Vue.js 2 | AWS (S3, SQS) | MySQL

- Developed full HRMS module with timesheet automation, attendance tracking, and performance reporting
- Integrated AWS S3 for file storage and AWS SQS for asynchronous job queuing
- Built Project Management and QA modules with real-time status updates
- Implemented workflow automation reducing manual HR tasks through automated approvals

XWatt – Solar Service Management

Laravel 11 | Flutter | Firebase | MySQL

- Developed REST APIs consumed by Flutter mobile app with concurrent user support
- Built Laravel Admin Panel for service management, inventory, and dispatch optimization
- Integrated Firebase OTP authentication with real-time notifications
- Optimized API performance for mobile-first architecture

EDUCATION

Master of Computer Applications (MCA) | Charusat University, 2020–2022

Bachelor of Science (Computer Science) | Sardar Patel University, 2017–2020

KEY STRENGTHS

Full-Stack Ownership | Enterprise Architecture | Security & Compliance | Performance Engineering | API-First Design | Modern Frontend Development | Agile Collaboration | Production Debugging
